Research Focus

The efficiency of LLM inference: model compression, KV cache optimization, adaptive serving (cascading and speculative decoding), and inference parallelism for production systems.

Education

Ph.D. in Computer Science, Carnegie Mellon University 2023 – 2028 (exp.)

Language Technologies Institute, School of Computer Science. Advisor: Prof. Virginia Smith.

B.Sc. in Computer Science, Federal University of Agriculture, Abeokuta 2017 – 2023

Research Experience

Applied Scientist Intern, AWS AGI Foundations May – Aug 2026

San Francisco, CA. inference optimization science team (Bedrock); mentors: Drs. Nathan Pemberton & Kyle Ulrich. In-place speculative decoding via gated LoRA adapters, mask priming, and verifier-gated loss in quadratic and draft-then-verify topologies.

Graduate Student Researcher, Carnegie Mellon University Aug 2023 – Present

Pittsburgh, PA. Advised by Prof. Virginia Smith. Algorithmic methods for efficient ML inference.

Independent Researcher, ML Collective Apr 2021 – Present

Remote. Pre-Ph.D. research mentored by Drs. Rosanne Liu & Jason Yosinski; now mentoring junior researchers within the same open-science pipeline. Resource-constrained NLP, federated learning, and efficient ML.

Peer Review & Professional Service

- **ML/AI:** NeurIPS (2024, 2026); ICML (2026); ICLR (2025, 2027); AISTATS (2025, 2026); AAAI (2026); ES-FoMo @ ICML (2024).
- **NLP:** COLM (2025, 2026); ACL Demo (2025, 2026); EMNLP Demo (2024, 2025, 2026).

Honors & Awards

- **Scholar, Machine Learning Summer School (MLSS) NYC** (Columbia University): competitively selected among ∼200 Ph.D. researchers worldwide; fully funded. 2026
- **Research Grant, Algorand Foundation**: $114,635 Ecosystem grant for an ML research-engineering project (the ASAlytics platform). 2022
- **National Artificial Intelligence Champion**, Nigeria Computer Society: first place, national AI Challenge. 2022
- **Ideathon Winner** ($5,000 Google Cloud credits), Deep Learning Indaba, the continent's foremost ML gathering. 2022
- **Best Poster, Data Science Nigeria.** 2021
- **Winner, DeepQuest AI Challenge.** 2021
- **Scholar, MTN Foundation Science & Technology Scholarship**: selection rate 1.8%. 2020, 2021
- **Led AI+ Abeokuta to Data Science Nigeria's "AI City of the Year"**: as community lead, produced the largest national-bootcamp cohort of any Nigerian city. 2020
- **Runner-up, "Mr. Algorithm," Data Science Nigeria**: nationwide community vote, for technical excellence and knowledge-sharing. 2020
- **Fellow, Young Professionals Bootcamp**: selection rate 3.6%. 2020
- **Gold Medal, NaijaHacks**: AgroAI plant-disease-detection app; top 12 of 336 teams. 2019

Leadership & Community Service

- **Founder & Lead, ML Collective Africa** 2023 – Present
  Founded and lead the Africa program of ML Collective, a 501(c)(3) research non-profit, and act as its research lead: agenda, weekly research meetings, study programs, project advising, and a team of

organizers and mentors. Administer ML Collective's Google Cloud compute grant (proposal review and allocation). Raised over $50,000 since 2022 for African researchers' Deep Learning Indaba attendance; chaired the program's workshop at the Indaba 2026 ("Whose Intelligence? Building Agentic AI in Africa without Frontier Model Dependency").

- **Campus Lead, AI+ FUNAAB; lead, AI+ Abeokuta** (Data Science Nigeria) 2019 – 2021
  Built a structured remote preparation program that took the community from five national qualifiers (2019) to 38 of 42 entrants selected (2020; 28 in the national top 250, nine in the national top 20).
- **Community Lead, Google Developer Student Clubs, FUNAAB** 2021 – 2022
  Technical training reaching 3,000+ students; 600+ taught personally.
- **Mentor, STEM for Development** 2023 – 2025
  Mentor 20+ graduate-school applicants per year toward U.S. and other leading research programs.
- **Mentor, She Code Africa** 2021 – 2022
  Mentored women entering machine learning and data science.

Selected Teaching

Guest Lecturer (Model Compression) & Teaching Assistant, 10-718 Machine Learning in Practice, CMU Spring 2026

Invited Lecturer, AI Saturdays Lagos (AI6) Fall 2023

Selected Invited Talks & Presentations

(Research orals marked †; invited talks/panels noted.)

- **2026:** "Doing ML Research from the Margins," skills session, Deep Learning Indaba (Lagos); "A SOTA Overview of Efficient AI, and What It Means for Africa," IndabaX Nigeria *(invited)*.
- **2025:** Black in AI ELAI graduate-school talk *(invited)*; CMU Africa Research Club *(invited, ×2)*.
- **2024:** Low-resource LLM practicals, Deep Learning Indaba (Senegal).
- **2023:** Cohere For AI (C4AI) Independent-Research panel *(invited)*; OSCAFEST.
- **2022:** IJCAI†; Deep Learning Indaba ML-efficiency talk (Tunisia); Lanfrica Talks *(invited)*; EuroPython (Dublin); PyConDE & PyData Berlin; Berlin Buzzwords; Build Stuff; SciPy (Austin, Texas); NCS AI Summit; DataFest Africa; GDG Abeokuta DevFest *(invited)*.
- **2021:** NeurIPS ML4D†; Masakhane Speaker Series *(invited)*; PyData Global; EuroPython; PyCon APAC; Conf42 Python; ML Collective Research Jam (×3).
- **2020:** PyData Global; PyCon Africa.

Selected Industry Experience

Founding ML Engineer, ASAlytics 2022

Backend systems for real-time opinion-mining/analytics of blockchain's digital assets; the vehicle for the Algorand Foundation research-engineering grant.

Data Science Intern, SeqHub Analytics LLC, New Haven, CT 2021

Fine-tuned mT5 for low-resource Nigerian-language machine translation; built microservices and a dockerized analytics dashboard.

Selected Media

Interview on the sign-to-speech research, AIhub (2022); talk recordings on PyVideo.

Updated October 2026
